

Limited 10-Year Warranty¹ for Clear-Fusion™ Pro Nano-Coating

Shower glass protected with Clear-Fusion Pro™ Nano-Coating is guaranteed to remain more water repellent than untreated glass for 10-years as long as basic manufacturer maintenance recommendations are followed and no harsh or abrasive cleaners are used.

Diamon-Fusion International's Clear-Fusion Pro™ nano-coating chemically bonds to the glass and creates a protective nanofilm that when applied by trained professionals is guaranteed not to haze, chip, crack, peel, or yellow for the lifetime of the glass. In the event of a covered product failure, Diamon-Fusion International will provide materials necessary for retreatment. DFI's liability is limited to the cost of replacing DFI chemical materials and will in no way extend to indirect, incidental or consequential damages incurred in relationship to this product.

Clear-Fusion Pro™ maintenance products, available from Diamon-Fusion International, will assure a clear and easy to clean surface for many years even after this warranty has expired. Ask your Diamon-Fusion International reseller about the *Consumer Maintenance Kit* and *Express Care Kit*, both are easy and complete systems for following manufacturer recommended maintenance and more.

To Keep Your Warranty In Force

Protecting your glass with Clear-Fusion Pro is a wise investment that will reduce the time and effort you spend cleaning. While Clear-Fusion Pro dramatically reduces the cleaning requirements of your glass, just like the non-stick coating in a frying pan, you do have to perform some basic cleaning and maintenance to ensure on-going performance.

Following the maintenance instructions below will ensure many years of satisfaction. Use of the *DFI Consumer Maintenance Kit* or *DFI Express Care Kit* can extend the life of Clear-Fusion Pro coating and the glass it protects well beyond your 10-Year Warranty.

Basic Maintenance Recommendations to maximize the life and benefit of your DFI treated surface:

After each use: Rinse or spray the surface with cool (for best results), clean water. Wipe it dry or let the water drain off and pat dry the few remaining droplets.

Once a week: Wet the surface and use a nylon body puff and go over the wet surface, rubbing in a circular motion. You should feel places that are "sticky" going back to slick again. Then rinse or spray the surface with cool, clean water just as you do after each use. Wipe it dry or let the water drain off, and pat dry the few remaining droplets.

If you haven't followed the Basic Maintenance Recommendations:

A *DFI Consumer Maintenance Kit* can be used to restore your surface. This kit is available from Diamon-Fusion International resellers nationwide. - BUY ONLINE @ DIAMON FUSION. COM

For your convenience, the *DFI Consumer Maintenance Kit* and *DFI Express Care Kit* include everything you need to satisfy the Basic Maintenance Recommendations and more:

- Nylon Cleaning Puff - To wipe down the treated surface on a regular basis.
- White Scrubber Pad - For use if the basic maintenance has not been performed.
- DFI Restoration Powder - Also for use when the basic maintenance has not been performed.
- DFI Revitalizer - This is used to bring back your DFI treated surfaces to "just applied" condition. It can also be used as a basic protective treatment for anodized aluminum frames and hardware, and vinyls and plastics.
- Microfiber Towel - Used for polishing the glass after applying the Revitalizer.

The *DFI Consumer Maintenance Kit* contains everything above including 16 ounces of Revitalizer and the *DFI Express Care Kit* simply has smaller quantities of Revitalizer and Restoration Powder.
